**We offer good design, good cost, good function.
Let us know if you need housing equipment.**

1. Trust in the design

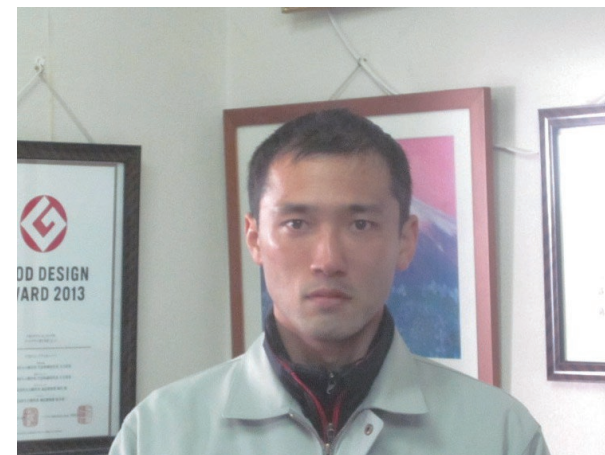

Four people belong to our R&D Department.
We have more members than same profession companies of the same scale.
We acquired 148 patents and two utility models on our products and won four kinds of Good Design Award.
Both KURIKI product and OEM article is getting the trust of our clients very much.
We are producing new innovative products every day.

Four people of the R&D Department.

R&D Division Manager
YOSHINORI TAGUCHI

SHINICHIRO KUDO

MASAHIRO OMI

YUICHI SAKURAI

2. Trust on the functions

Our products which the R&D team of five people produces have added value which other brands do not have. The idea that other brands do not have is included in our function products such as Lever lock, Hook lock and Soft close.

Customer's impression 1: Development section manager in Company Y .

Kuriki's Soft Close for hinged door has automatic return function which other brands do not have.

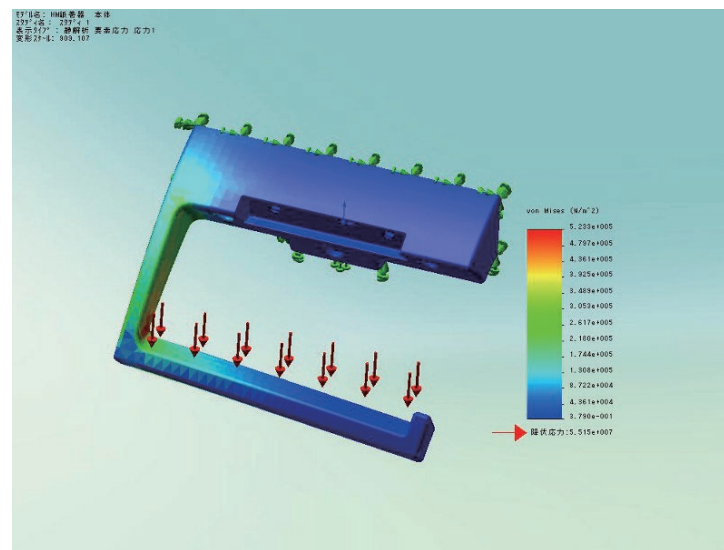

Customer's impression 2: Development section manager in Company L .

Kuriki's Lever handles are very firm, and is not broken. We have adopt them more than 20 years, but there are not any problem and it extremely possesses high reliability.

Customer's impression 3: The section manager of quality assurance department in Company T .

When our employee performed the strength confirmation of paper holder made from stainless steel of Kuriki, he kicked it with a sole with all his might.

However, there is little the deformation of it and we can use even a product for public works projects safely.

Analysis by 3D-CAD

Materials strength testing

Salt water spray testing

Testing of Lever handle

3. Trust on the cost

We have cooperative Guangdong factory and cooperative Ningbo factory, in addition to own Ibaraki factory in Japan and own Tianjin factory in China.

We enable the production at the most excellent place for each products and parts in terms of the quality and the price.

Local Procurement Ratio of our Tianjin factory is higher than 99% and overwhelms other Japanese companies.

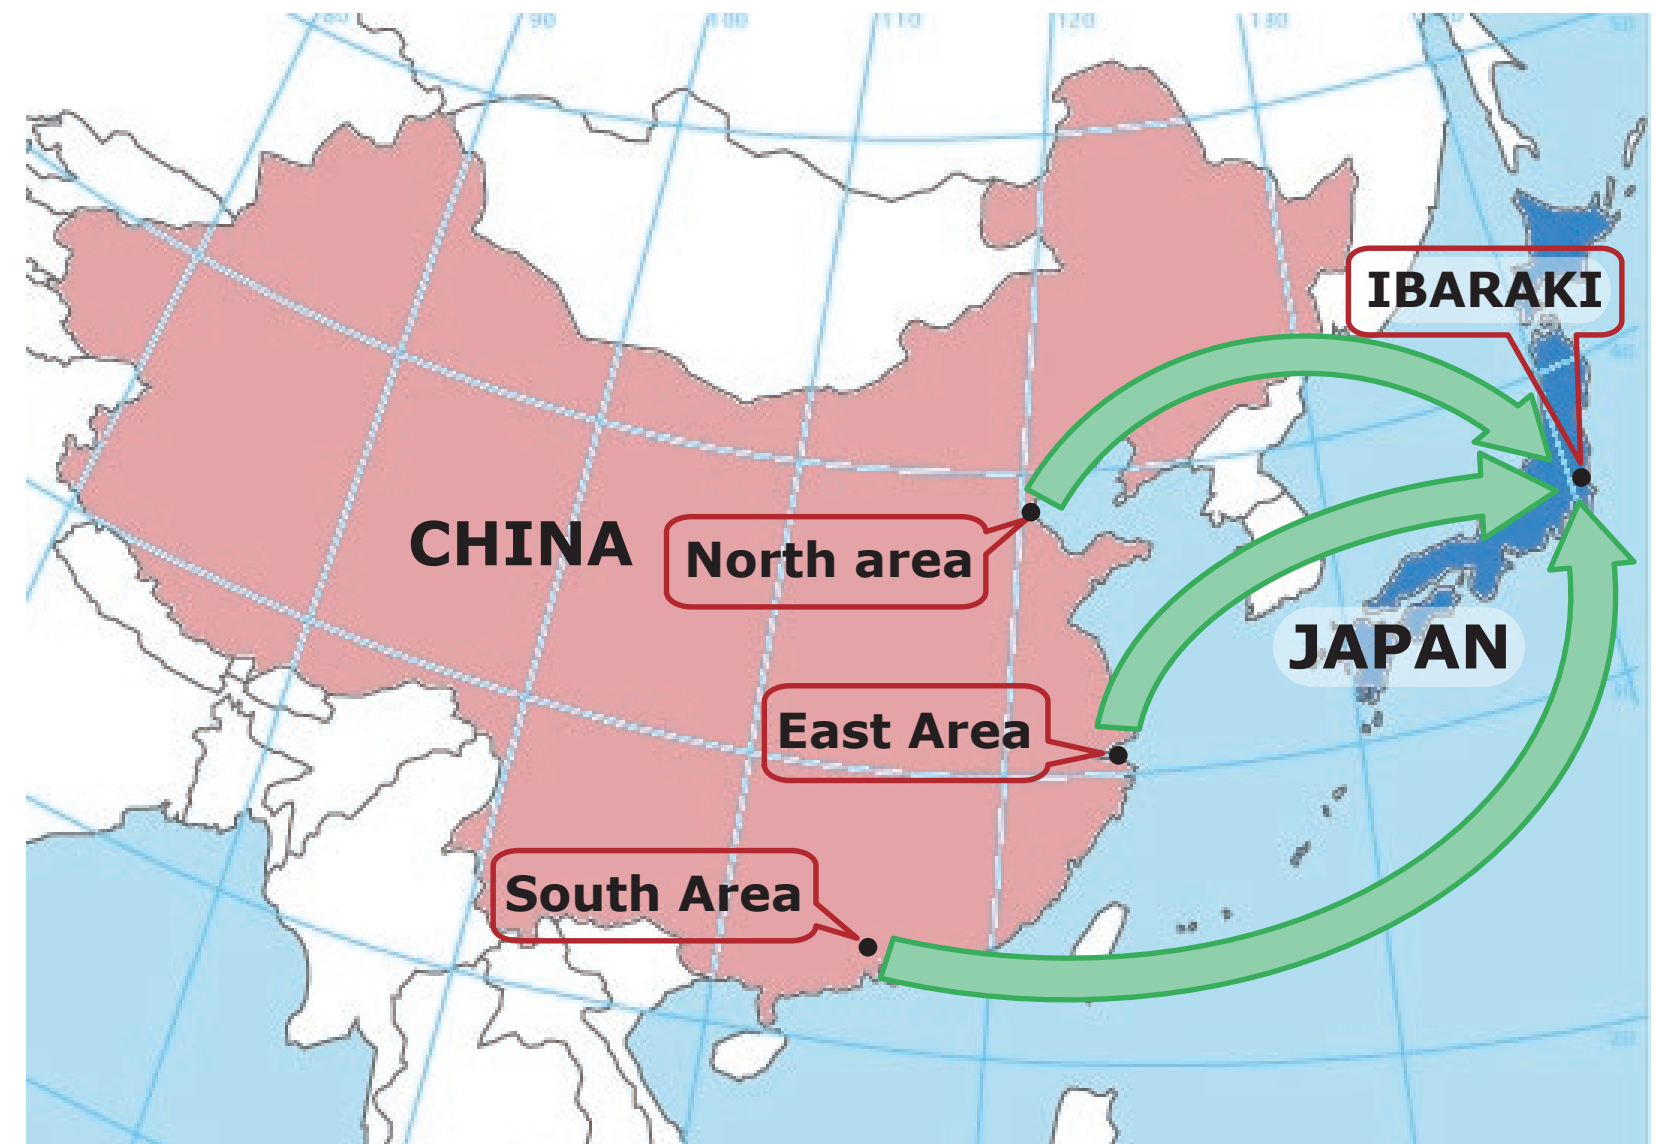

Company L which is our main customer often visits Tianjin to learn height of Local Procurement Ratio of us.

All products and parts are shipped after the last process of manufacture or an inspection process at Ibaraki factory or Tianjin factory.

Our main customers in Japan evaluate the cost highly as well as the quality and the delivery.
