KURIKI HARDWARE

LEVER HANDLES AND BUILDERS HARDWARE CATALOG

About Kuriki Manufacture

Kuriki Manufacture Co., Ltd. is an ISO9001 certified manufacturing company focus on making architectural hardware and bathroom accessories, such as lever handle, hinged and sliding door fittings, toilet paper holder, towel bar, etc.

In more than 50 years, we are committed to helping everyone live more comfortably by producing Japanese high-quality products. We understand that a good product does not only mean well-functioning. A good product should cover safety, universality, and aesthetically pleasing design. We always put our best effort into creating a product that can cover all of those fields, and several times now, our products have won the Good Design Award and achieved patents and utility models.

Until now, our bathroom lever handle still occupies the largest share in Japan, and the big residential developers here also widely adopt our products. But, most importantly, they have gained trust from the customers in the international markets. Our hotel lever, for example, is now used in well-known hotels, namely Swissotel the Stamford- Singapore, Village Hotel Sentosa- Singapore, The Outpost Hotel- Singapore, The Standard King Power- Thailand, Waldorf Astoria- Thailand. In the upcoming years, together with the growing number of customers, we will continue to be a leading manufacturer in providing hardware for residential and buildings in general.

GOOD DESIGN This product won the Good Design Award.

Icon guide

The following icons symbolize the features of the products in this catalog.

- ◀ **Patent and Design Patent**
The product has an exclusive right given for either utility or design patent.

- ◀ **Good Design Award**
The product won the Good Design Award selected by Ministry of International Trade and Industry.

- ◀ **Rectangle Plate**
The product has a rectangle strike plate and faceplate.

- ◀ **Round Plate**
The product has a round strike plate and faceplate.

- ◀ **Load Capacity**
The product is applicable on doors with a maximum weight shown in the icon.

- ◀ **Door Thickness**
The product is applicable on doors with a specific door thickness shown in the icon.

- ◀ **Screwdriver**
The product can be installed easily using a screwdriver.

- ◀ **No Tools**
The product can be installed easily without using any tools.

- ◀ **Water Resistant**
The product can be used in the bathroom.

- ◀ **Digging Necessary**
To install a product, you will need to drill or dig into the door, frame, wall, etc.

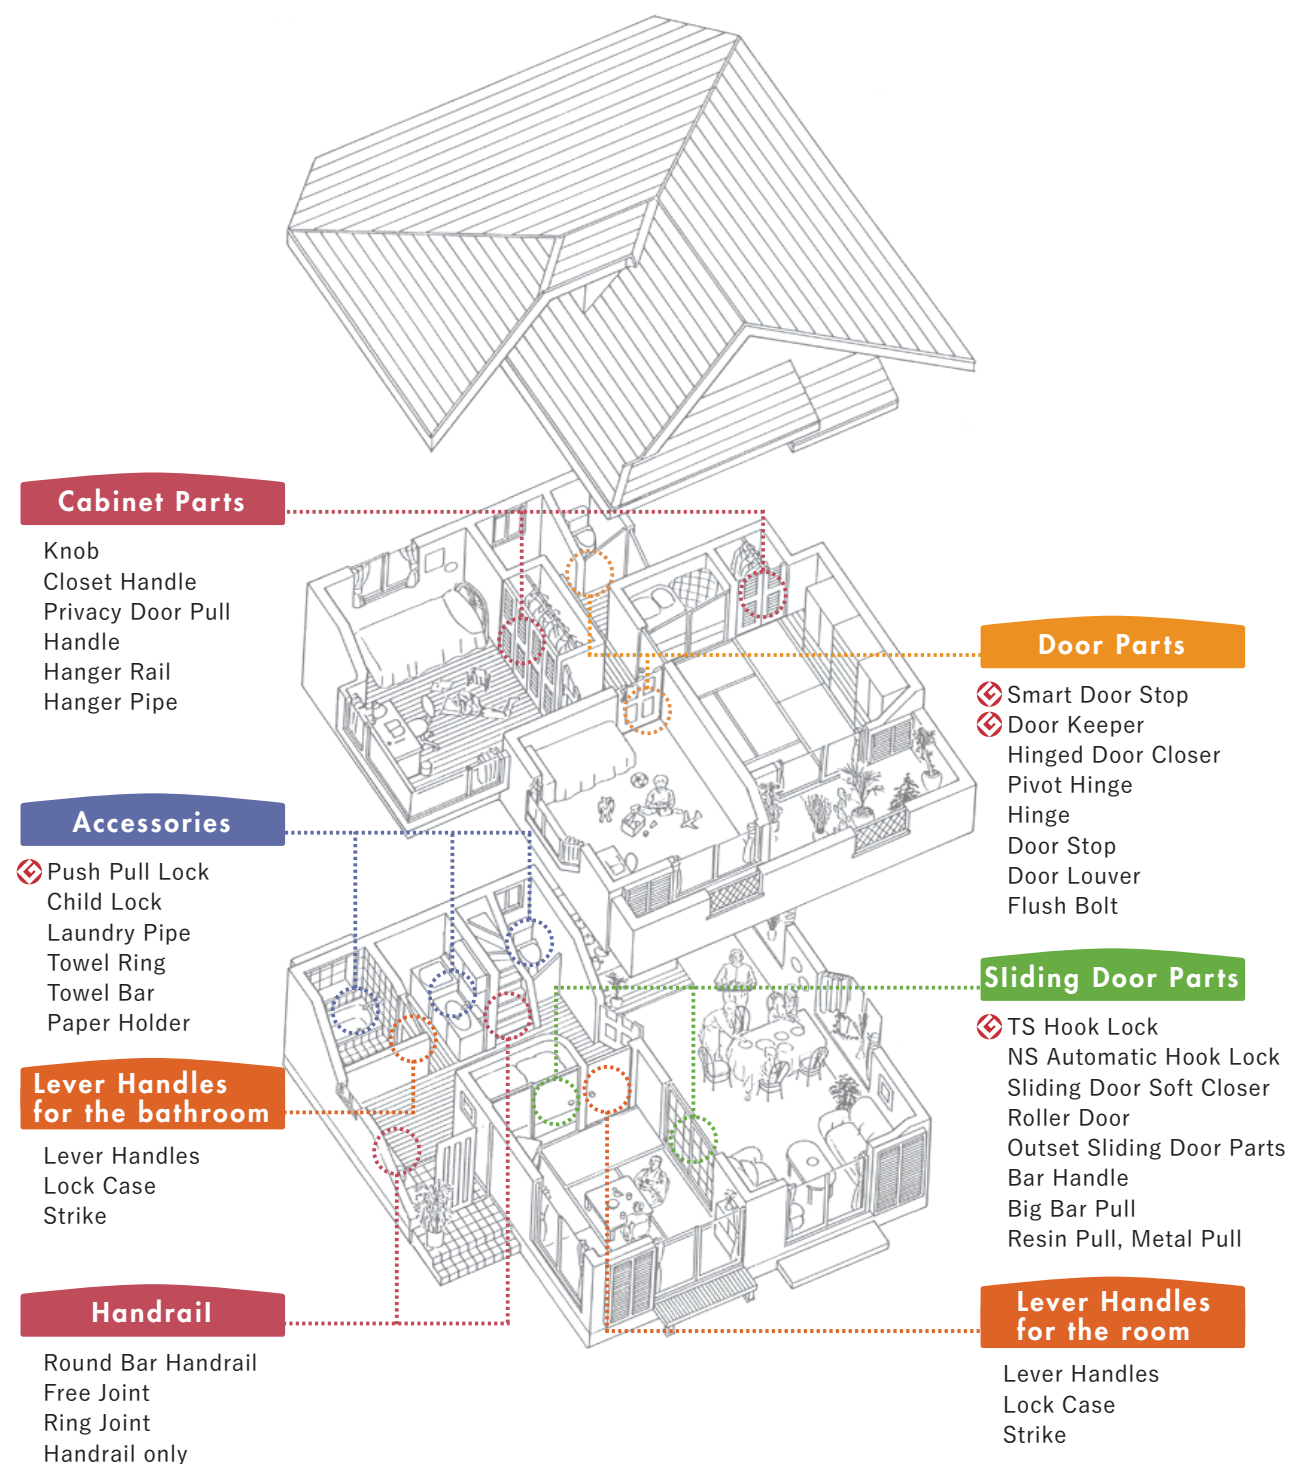

- ◀ **Adhesive Necessary**
To install a product, you will need a suitable adhesive to combine parts.

- ◀ **Build to Order**
The product is not built until a confirmed order for the product is received.

KURIKI, delivering safe and convenient products for everyone.

Adjustment Method

Hinged Door Adjustment

	Problem	Solution	
①	The door hits the side jamb. 	Pivot Hinge (Upper Body) 	Pivot Hinge (Lower Body) 
		Adjust the door position to the sides by turning the adjusting screw in the upper and lower pivot hinges.	
②	The door hits the sill/ flooring. 	Pivot Hinge (Lower) 	
		Adjust the door position up and down by turning the adjusting screw in the upper and lower pivot hinges.	
③	Inclined doors. 	Pivot Hinge (Upper Plate) 	Pivot Hinge (Lower Plate) 
		Loosen the fixing screws in the lower pivot hinge and reposition it horizontally to create a proper vertical door position. Do not forget to fasten the screws once you finish the adjustment.	

④ Adjustable-strike adjustment.

Adjust the depth of the adjustable strike by turning the screw shown in the picture. Make sure that the latch fits perfectly into it to prevent a rattle, thus the door can function well.

Sliding Door Adjustment

	Problem	Solution	
①	There is a gap between the door and the side jamb when the sliding door is in the closing position. 	Hung Door Roller 	Door Roller (Lower) 
		Adjust the sliding door up and down by turning the adjusting screw.	
②	Inclined sliding doors. 	Hung Door Roller 	Door Roller (Upper & Lower) 
		Adjust the sliding door to the sides by turning the adjusting screw.	
③	The hook lock does not work well. 	Adjustable Strike 	
		Adjust the strike plate, so the hook falls down properly by adjusting the screws shown in the pictures. Do not forget to fasten the screw once you're done with the adjustment.	

④ The sliding door rattles.

It is possible to reduce the rattle of the sliding door by adjusting the screwn shown in the above picture.

Lever Handles

Concept

- Through different approaches in material, function, performance, design, and production cost, we provide high-quality products at an affordable cost.
- All lever handles and lock cases have passed strict endurance tests.
- Providing a wide range of designs to suit your living space.

Locks Function

Type	Reference Diagram	Example of Use
1 Passage Lock		The passage lock is installed in the door of a room that doesn't need a lock, such as a closet, children's room, living room, dining room, etc.
2 Privacy Lock		The privacy lock is installed in the door that can be locked inside of the room. In an emergency situation, someone can open it from outside by a tool.
3 Indicator Lock		The indicator lock is installed in the door that need to display a lock sign. It can be used in a bathroom and a toilet. In an emergency situation, someone can open the lock from outside by a tool.
5 Cylinder Lock (Built to Order)		The cylinder lock is installed in the door that need to be locked from inside using a thumb turn and from outside using a key, such as main door or any other private room.

Lock Cases Type

FL (Backset 51)

A set of lock made of low-priced steel.

Material: <Case>Steel <Front>Stainless
Finishing: <Case>Chromate <Front>Hairline
Faceplate: Rectangle, Round

FR (Backset 51)

A set of lock made of low-priced steel.

Material: <Case>Steel <Front>Stainless
Finishing: <Case>Chromate <Front>Hairline
Faceplate: Rectangle, Round

KU (Backset 32)

A set of lock case made of resin with a soundproof features.

Material: <Case·Front>Resin
Finishing: <Case·Front>Pearl White
Faceplate: Rectangle

FT (Backset 51)

A tubular lock that is easy to install on the door.

Material: <Case>ZDC <Front>Stainless
Finishing: <Case>Chromate <Front>Hairline
Faceplate: Round

FU (Backset 32, 51)

A set of lock made of stainless steel with excellent durability.

Material: <Case·Front>Stainless
Finishing: <Case>Metal Fabric <Front>Hairline
Faceplate: Rectangle

LU (Backset 32)

A set of lock case made of resin with a soundproof features.

Material: <Case>Resin <Front>Stainless
Finishing: <Case·Front>Silver
Faceplate: Rectangle

What is a Backset ?
Backset is the distance from the faceplate to the center of the lever handle or thumb turn installed on the door.

How to measure the backset ?
Use a length measurement tool to measure the distance from the side edge of the door to the center of the hole where you put the lever handle or thumb turn on the door.

- ※ 1 : The escutcheon type depends on the type of lock case. Please be careful when specifying the product number.
- ※ 2 : Only FU lock case has two kind of backsets, 32 and 51.
- ※ 3 : Alumite finish can only applied for Aquila (01), Draco (03), Fornax (04), Norma (15) handle.
- ※ 4 : AP4 and BP4 type handles cannot be fitted in FL, FT, and FR lock case.
- ※ 5 : Please contact the Sales Division " tianjin6@kuriki-ss.co.jp " if your door thickness is not listed on page 6.
- ※ 6 : Our standard lock case is suitable for a right-hand door. Please refer to the product manual if you want to change it to fit on left-hand door.

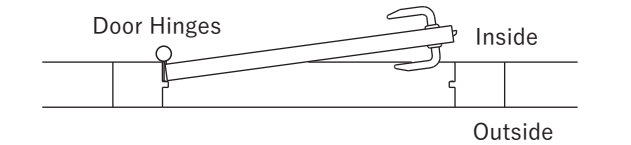

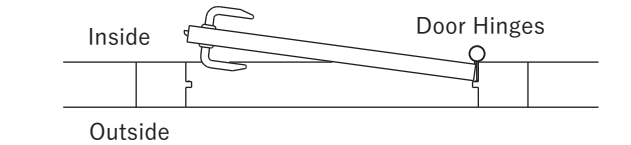

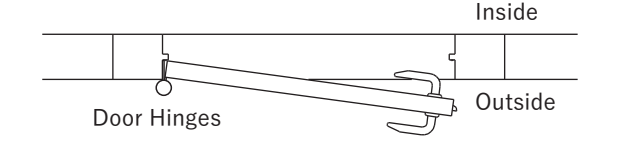

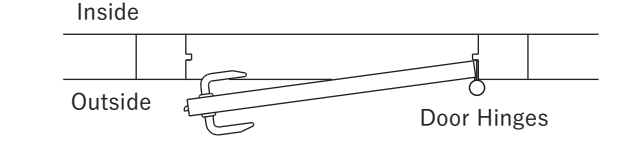

Explanation of Right-Hand and Left-Hand

Kuriki Standard

We determine the right-hand or left-hand door by standing in the side of the door where you can see the hinges. If they are on your right side, then it is a right-hand door. Meanwhile, if they are on your left side, then it is a left-hand door.

	
Left-Hand	Right-Hand

Example (Foreign Countries)

	
Left Hand	Right Hand
	
Left Hand Reverse	Right Hand Reverse

Aquila Type 01

This lever comes with a column shape that gives to the handle a symmetrical and elegant look. The grip part is designed with a perfect diameter to create comfort and safety.

Door Parts

Hinged Door Soft Closer

Patent

45kg
OK

This door closer is suitable for indoor use, either on a new or an existing door. It helps to reduce the unpleasant noise of the door hitting the frame and prevent it from slamming shut. The door closer will decelerate the speed of the door at ±40 mm towards the end and automatically pull the door to close perfectly. The installation can be done easily using the attached pattern paper. Once installed, the closing speed can be adjusted. Compared to the other products, ours has outstanding durability as it has passed 500,000 times during the performance test.

Adjustable range: Up- down ±5 mm, right- left ±5 mm,
front- back ±4 mm
Material: <Main unit/ Spool bracket>Resin, Steel
<Liner>Steel

Concealed Hinged Door Closer

Patent

30kg
OK

A concealed hinged door closer for indoor use provides the functionality of an overhead door closer but is fitted within the door leaf and frame. This product helps decelerate the speed of the door at ± 100 mm towards the end and self-closing itself slowly to reduce the unpleasant noise of the door hitting the frame and prevent pinched finger accidents. In addition, this type of installation is aesthetically pleasing and helps reduce vandalism, as most of the door closer is hidden from sight. Once installed, the closing speed can also be adjusted.

Material: (Main unit) ZDC
(Spool bracket) Resin
Load capacity: 30kg(297N)
※Please contact us for 70kg(686N) pecifications.

Smart Door Stopper (Magnet Type)

Using a magnet with a strong force, this door stopper can hold a door open and helps eliminate any damage to the adjoining wall. The installation is effortless and can be fixed either on a new or existing door. The mounting screws are invisible, and the height of the floor-mounted part is only 3 mm making this product barrier-free. This door stopper also passed the 100,000 times performance test. Moreover, this product won the Good Design Award for its seamless and smart design while maintaining maximum functionality.

Doors Keeper (Magnet Type)

This door keeper uses a strong magnetic force that works well on a heavy door to stop it. Pushing the door once it is stopped will turn it into a lock position, and there will be no chance of it slipping and swinging through when opened. However, it will need a little to no effort to pull and close the door. The installation is effortless and can be fixed either on a new or existing door. In addition, the floor-mounted part is only 3 mm making this product barrier-free. This durable doorkeeper has also passed the 100,000 times performance test and won the Good Design award for its smart design while maintaining maximum functionality.

Pivot Hinge

Patent

30kg OK

33-36mm

This hinge is fixed in the top and bottom of the door. The design is slim, so it doesn't interfere with the design of the door. Once the bottom part is fixed, the upper part is easily set by pulling down the upper pin and put it back in place. Once installed, the front-back, right-left, up-down adjustment can be made easily using a screwdriver. This type of hinge is very durable as it has passed 200,000 operation tests, and it is also available in four high-quality finishing colors.

Material: (Main unit)Steel, ZDC (Cover)Resin
Load Capacity:30kg(294N)
Recommended Door Thickness:33mm

Light Indicator Lens

This device helps users recognizing if the light inside a room is on from outside. The indicator lens can be easily attached to the door by pushing it into the hole (prior drilling needed). The thin ring on both ends is designed with a wider surface to hide the mark of the drilled hole on the door. It is available in three types: round type with $\Phi 35$ and $\Phi 38$, also square type.

Round Type 35

The design is thin and well-trimmed, so it does not muddle the design of the door. We provide 7 different colors to complement any doors color.

Material: Resin
Door Thickness: 28~36mm

Round Type 35		
Product No.	Finish/Color	
250311	Birch	K
250312	Natural	N

Sliding Door Parts

Clear Cut Hook Lock

This hook lock for indoor sliding doors is good to prevent the door from accidentally being locked. It's impossible to operate the lock unless the door is hitting the trigger part and close perfectly. The product is universal as it can be configured with a standard lever or UD lever with a bigger grip so that everybody can use it easily. UD lever also uses blue and orange indicators, which is easier for anyone to recognize. The cylinder type uses a dimple key that provides 100 combinations, and there are 2 master keys available to generate 126 different child keys combinations. (Please contact us for further details.)

The lock is available in 4 different functions.
The escutcheon is available in round and square types.
The thumb turn is available in standard thumb turn type, standard lever type, and UD lever type.
Available in 6 different colors to guarantee a perfect harmony with the different series of sliding doors.

TS Hook Lock

TS Hook Lock is a well-design product winning the Good Design Award. It combines a hook lock and a puller in one unit to be attached to an indoor sliding door. The lock-unlock operation can be done easily by sliding the knob up and down (see fig. Detailed photo 1). It has a streamlined design and a vast surface with some textured parts to highlight a modern minimalist style. On cylinder type, a dimple key with 100 combinations is used to ensure safety. The strike plate is available with or without a trigger. and there are 6 different colors to complement any sliding door color.

TS Hook Lock

With trigger

TS Hook Lock + Adjustable Strike

Strike digging drawing Pull-Lock Case digging drawing

Detailed photo 1

With trigger
When the sliding door is open, the hook doesn't protrude. The trigger retracts into the case when the sliding door is closed.

NS Automatic Hook Lock

By adding up a magnet, this product not only can prevent the door from not closing perfectly or bouncing back. But it can also automatically lock the door by dropping the hook once the door is pulled to close entirely by the magnet force. Pull the puller to lift the hook, and the door will become moveable. The product without a lock is also an option for your sliding door.

How it Works

CL Automatic Hook Lock

Not only provides the automatic-locking mechanism and other extensive practical benefits, but this lock is also designed exclusively to meet the demand for a good product, functionally and aesthetically. This product uses metal as the material, offering a solid and deluxe appearance, and the screws are also fixed in a concealed position, creating a seamless-looking product.

Anti-Shake Guide Pin

This pin helps the door running in the track, prevents it from swinging and shaking during opening or closing. When it collides with the door, the cylinder will spin, and the door will operate smoothly. Additionally, as it is concealed by the door, it doesn't interfere with the architectural appearance and causes no dangers for the user.

Sliding Door Soft Closer

This external type of soft closer can be installed on existing sliding doors. This door damper will catch closing doors ± 50 mm before the thud and then softly and silently close them. Thus, it reduces the unpleasant noise of the door hitting the frame and prevents the door from bouncing back. The door will close perfectly without any gap regardless of the strength or speed adjusted during installation. Compared to conventional products, this soft closer has twice better durability (passed 500,000 times operation tests).

Concealed Soft Closer

This is a door damper for an indoor bottom-running sliding door. It will slowly pull the sliding door from about 80mm before the end, and then it will close slowly and quietly. The door will close completely without any gap regardless of the strength adjusted during the installation. As this product is a concealed type, it will not disintegrate the architectural appearance. In addition, this soft closer has also passed 200,000 times operation tests which guarantee long-term use.
